## SPRINT-3

Date	07 November 2022
TEAM ID	PNT2022TMID45497
Project Name	IoT Based smart crop Protection system for agriculture
Maximum mark	20 marks

STEP1: Download and Install NODE JS.

STEP2: Setup node.js and configure command prompt for error check .open node-red from the generated link.

4 Nov 18:48:45 - [info] Creating new flow file

4 Nov 18:48:45 - [warn]

Your flow credentials file is encrypted using a system-generated key.

If the system-generated key is lost for any reason, your credentials

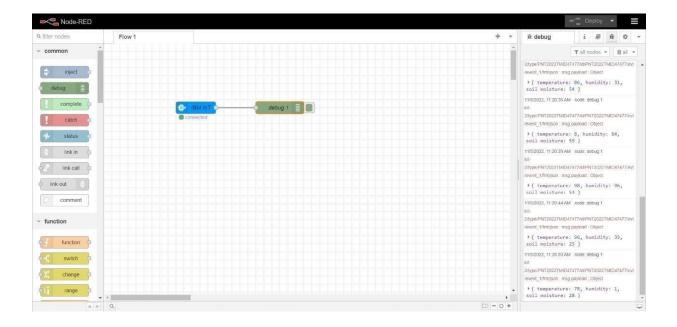

file will not be recoverable, you will have to delete it and re-enter
your credentials.

You should set your own key using the 'credentialSecret' option in
your settings file. Node-RED will then re-encrypt your credentials

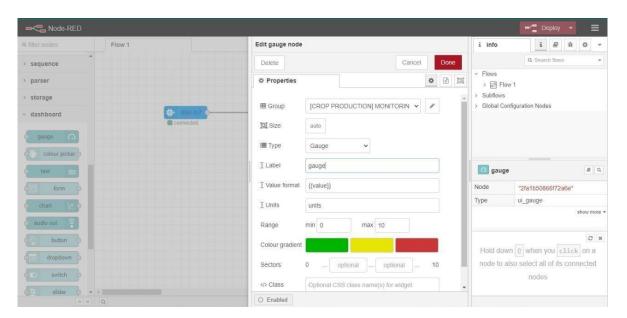

file using your chosen key the next time you deploy a change.

STEP3: Connect IBM IOT in and Debug 1 and Deploy.

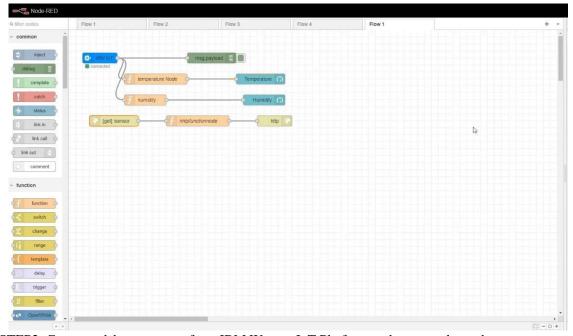

STEP4: Edit gauge node (Here the gauge nodes are named as Temperature, Humidity and Soil moisture).

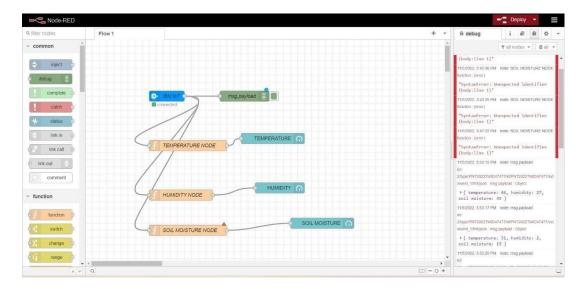

## **SIMULATION:**

STEP1: Simulated program to get the random values.

STEP2: Generate debug message from IBM Watson IoT Platform and connect the nodes.

STEP3: Generate the some output from recent events.
